

We care about your kids. And pets, too. So when it comes to safety, we take our role seriously. We offer a wide range of cordless products and other features to help reduce the risks of accidents. And we encourage you to assess all windows in your home for potential risks.

## CORDLESS CHOICES

**CORDLESS LIFT & LOCK™**

Press a button on the bottomrail handle to lift and lower the shade. Release the button to securely lock the shade into place.

**CORDLESS LIFT**

A light push or pull lifts or lowers shade to any desired position. There are no exposed cords.

**AUTOMATION**

Automation options eliminate operating cords and provide convenience for all windows, including those that are hard to reach. Raise and lower shades with the touch of a button, tap on an app or sound of your voice.

**WAND CONTROL**

Moves the blinds/shades side-to-side across the window with a sturdy wand.

**SHUTTERS – NO CORDS BY DESIGN**

By design shutters are cordless, eliminating potential safety hazards posed by operating cords.

Many of our child-safe options are Certified Best for Kids. Look for the logo when safety is a priority.

# EVERYONE IS RESPONSIBLE FOR CHILD SAFETY

## AWARENESS IS THE FIRST STEP IN PREVENTION

We support the Health Canada initiatives and have provided a checklist of requirements:

- Move all furniture, cribs, beds and climbable surfaces away from windows.
- Install only cordless window coverings in homes with young children.
- Check your current window treatments for exposed or dangling cords and replace them with products that meet the CWCR standard.
- For details about the Health Canada CWCR, click [here](#).

## WARNING NOTIFICATIONS

The window coverings industry uses warning labels and other methods to communicate the potential hazard of corded window coverings. Pay attention to these warnings.

For example, the warning shown here communicates the critical message about cords being a potential strangulation hazard and suggests selecting a cordless alternative.

**⚠ WARNING** STRANGULATION HAZARD – Young children can be strangled by cords. Immediately remove this product if a cord longer than 22 cm or a loop exceeding 44 cm around becomes accessible. Rev 7/21 Print 7/21

**⚠ MISE EN GARDE** RISQUE D'ÉTRANGLEMENT – Les enfants en bas âge peuvent s'étrangler avec des cordes. Enlevez immédiatement ce produit si une corde mesurant plus de 22 cm devient accessible ou si le contour d'une boucle de plus de 44 cm devient accessible.
